

Wallpaper Instructions for LaserFest Desktop Wallpapers

Mac and PC users have the option to download our desktop wallpapers and use these as background images on their computer desktops.

PC:

- Open the wallpaper image by clicking on the link to the appropriate size, depending on the resolution of your computer monitor
- Once the wallpaper image has opened, right-click on the image with your mouse and choose "Set as Background"
- The wallpaper image should now be set as your desktop background

Mac:

- Open the wallpaper image by clicking on the link to the appropriate size, depending on the resolution of your computer monitor
- Once the wallpaper image has opened, you can drag the image to your desktop
- From the Apple menu, select "Control Panels" and then select "Appearance"
- Click the Desktop tab and drag the wallpaper image onto the sample screen
- Click "Set Desktop"
